DEALER CATALOG

WHAT'S NEW FOR INJINJI FALL WINTER 2025

At Injinji, we pride ourselves in creating durable, blister-preventing toesocks that athletes trust year-round. This season, trail runners will enjoy the brand new Trail Midweight Over the Calf (OTC) sock, which combines moisture-wicking fibers and targeted cushioning with comprehensive lower leg protection for tackling rugged paths. As requested, two highly anticipated new colorways have been added to all of the Merino wool styles, including the Outdoor series, Liner Crew Wool and Run Lightweight No-Show Wool. To round out this exciting update, fresh nature-inspired tones are available in the Liner and Trail collections. No matter the activity or terrain, there's an Injinji sock for everyone this season.

ULTRA RUN SERIES

The Ultra Run series features cushioned terry throughout the entire foot, including the toes, to help soften the impact feet sustain during a run or workout. Linear knit lines on the underside of the foot offer additional arch support and a tighter fit to help eliminate friction. Light compression throughout the sock plus strategically placed mesh throughout the foot and leg offer extra ventilation and breathability. The Ultra Run Crew features a ribbed knit, while the Women's Ultra Run Crew features mesh waves to keep the legs cool.

RUN SERIES

The Run series offers innovative, restriction-free movement and eliminates skin-on-skin friction, which is one of the primary causes of blisters. Newly redesigned for optimal comfort, performance and protection, the five-toe sleeve design now incorporates moisture-wicking COOLMAX® EcoMade fibers, targeted arch support, a breathable mesh top, and a streamlined fit, uniquely tailored to left and right feet. From training runs to race day, Injinji running socks will go the distance by keeping your feet protected in any shoe.

SNOW SERIES

When running in cold weather conditions, the new Snow Over The Calf socks are the perfect companion for staying warm, dry and blister-free. THERMOLITE® EcoMade fibers offer performance benefits, including helping to generate heat using the body's infrared energy by utilizing hollow fibers to create an insulating layer of warm air within the sock. The anatomical fit prevents blister-causing friction, and the Over The Calf height protects the lower leg from the outdoor elements while staying secure. Targeted cushion underfoot and beneath each toe offers a plush feel and softens the impact of repeated footfalls.

TRAIL SERIES

Trail socks are engineered for uneven and unpredictable terrain, allowing the entire foot to perform naturally. The seamless five-toe design prevents blisters by eliminating skin-on-skin friction while the double cuff on the Mini-Crew, and the ribbing on the Crew and Over The Calf styles, provide a snug fit to keep dirt and debris out. This anatomically designed toesock will effectively wick away moisture from the foot and between the toes.

LINER SERIES

Injinji's Liner socks are designed to be worn as the first line of defense against excess moisture and blisters, keeping feet dry and comfortable. The five-toe design forms to the contour of your foot, allowing for natural, restriction-free movement. With each toe separated, all skin-on-skin contact between the toes is eliminated, helping to prevent blisters. Wear the Liner socks as a baselayer under an outer sock for extra cushion, or wear them solo everyday adventures.

OUTDOOR SERIES

Combining the classic Injinji five-toe design benefits with performance-enhancing Merino wool, the Outdoor Series provides comfort and optimum protection during every adventure. Unlock the potential of Merino wool during high-stress activities like running and hiking as it repels dirt and water, resists odor, wicks moisture and blocks UV rays. These soft, comfortable socks are cool in the heat and warm in the cold, providing extra ventilation from the breathable knit mesh located at the top of the foot.

LINER + HIKER SERIES

The Liner + Hiker is the perfect sock set for every hiking adventure. The Liner is an ultra-thin, lightweight baselayer designed to wick away sweat from your foot, keeping it dry and comfortable. Since the toes are separated, skin-on-skin friction is eliminated, helping to prevent blisters. The Hiker is worn over the Liner for increased cushion and protection. Made with wool, the Hiker mirrors the shape of your toes, providing more room and reducing bunching. The bottom of the Hiker and the top of the toe box feature an additional terry loop for maximum padding to keep your feet comfortable.

SOCK WEIGHTS

LW

LIGHTWEIGHT

Injinji's thinnest sock provides ultra-thin cushioning, allowing extra breathability and a light feel in any shoe. All Lightweight socks are made with a 200 needle-count (with the exception of Women's Run Lightweight).

OW

ORIGINAL WEIGHT

With the thickness of a traditional sock, Original Weight provides a moderate cushion, ideal for a wide range of activities.

MW

MIDWEIGHT

Designed for maximum protection, the Midweight sock features a padded heel and metatarsal for durability and protection.

MW+

MIDWEIGHT WITH PADDED TOES

With the same thickness as a Midweight sock, the Padded Toes weight offers terry cushioning in the toes and toebox for additional protection and comfort.

FIBER TECHNOLOGY

COOLMAX® EcoMade

Made from 100% post-consumer recycled polyester, the COOLMAX® EcoMade fiber helps keep you cool and dry. The abrasion resistant fiber boosts durability and lasts after repeated wear and washing.

südwollgroup

Süedwolle Group

From sheep to socks, Merino wool from Süedwolle Group is a Responsible Wool Standard Certified and eco-friendly premium Merino wool fiber. The natural fiber of Merino wool is renewable and biodegradable, adding another level of performance by resisting, odor, wicking moisture and blocking UV rays.

LYCRA®

The addition of this fiber provides stretch and recovery features for long-lasting comfort and a superior fit.

THERMOLITE®

This recycled polyester offers performance benefits for prolonged warmth, moisture wicking, and insulation. THERMOLITE® FAR INFRARED technology helps to generate heat using the body's natural infrared energy, and the fibers' hollow design creates an insulating layer of warm air within the sock.

Injinji, innovator of the Original Performance Toesock, is a company dedicated to the health and performance of feet since 1999. By redesigning the basic structure and shape of a traditional sock, toesocks help to enhance the function and freedom of the foot while inside any shoe. The five-toe interface provides total foot utilization, helping to properly align and splay the toes which allows the entire foot to be engaged in any athletic activity. With each toe wrapped in sweat-wicking material, skin-on-skin friction is eliminated, helping to protect against blisters and hotspots. Injinji strives to make the journey of life more comfortable and truly believes that whatever the athletic endeavor, there is a toesock to enhance the experience.

MANIFESTOE

...Forever committed to innovation that allows your feet to live and perform at their peak.
We are...a better way.
